Medicine and vaccines: follow your own vet for every medicine, dose and vaccine date. This list reminds you of the job; your vet decides the treatment.

1 Before the batch (7 days)

- [ ] Shed and pens cleaned and disinfected
- [ ] A separate pen ready for new animals
- [ ] At least two weeks of fodder, wanda, chokar and salt in stock
- [ ] Scale or weight tape, ear tags, register or app ready
- [ ] Deworming and vaccine plan agreed with your vet
- [ ] Budget written: purchase, transport, commission, feed per day, medicine, labour

2 Mandi day

- [ ] Teeth (age), frame, legs, eyes and breathing checked
- [ ] No sick or very weak animals
- [ ] Weight and price of every animal written down
- [ ] Transport, commission and mandi fee written separately

3 Day 0 to 1

- [ ] Rest, shade, clean water first, then light fodder
- [ ] Tag, photo and starting weight for every animal
- [ ] New animals kept in the separate pen for 7 days

4 Day 2 to 7

- [ ] Deworming: medicine and dose as your vet advises
- [ ] FMD (munh khur) and HS (gal ghotu) vaccines, dates written
- [ ] Wanda increased little by little
- [ ] Any animal leaving its feed noted and checked

5 Day 8 to 30

- [ ] Daily ration of each pen written down
- [ ] Daily feed cost written down
- [ ] Day-30 weight; ADG = (new weight – old weight) ÷ days
- [ ] Slow-growing animals separated and checked

6 Day 31 to 60

- [ ] Ration adjusted to the new weights
- [ ] Day-60 weight and cost per animal so far
- [ ] Rates asked from buyers

7 Day 61 to 90

- [ ] If medicine was given, its withdrawal period is complete
- [ ] Final weight
- [ ] Break-even rate = total cost ÷ weight
- [ ] Buyer rate, weighing method and payment date agreed

8 Sale and after

- [ ] Farm weight and slaughterhouse weight both written
- [ ] Amount, received and balance written
- [ ] Profit per animal worked out
- [ ] Note which mandi gave the best animals
